OnPoint

BUSINESS CASE

ValueBridge

Turning excess inventory and returns into recovered value, for brands and for OnPoint

BUSINESS STRATEGY 2026-2030

EXECUTIVE SUMMARY

OnPoint

ValueBridge turns assets OnPoint already runs into a fee-only recovery business: $27.2M net revenue by 2030

HOW THE MODEL WORKS

01 Brand approval

SKU-level proof of quantity, condition, ownership and resale rights. The brand signs a gain-share mandate with an agreed reference value before any lot is offered.

02 Two resale routes

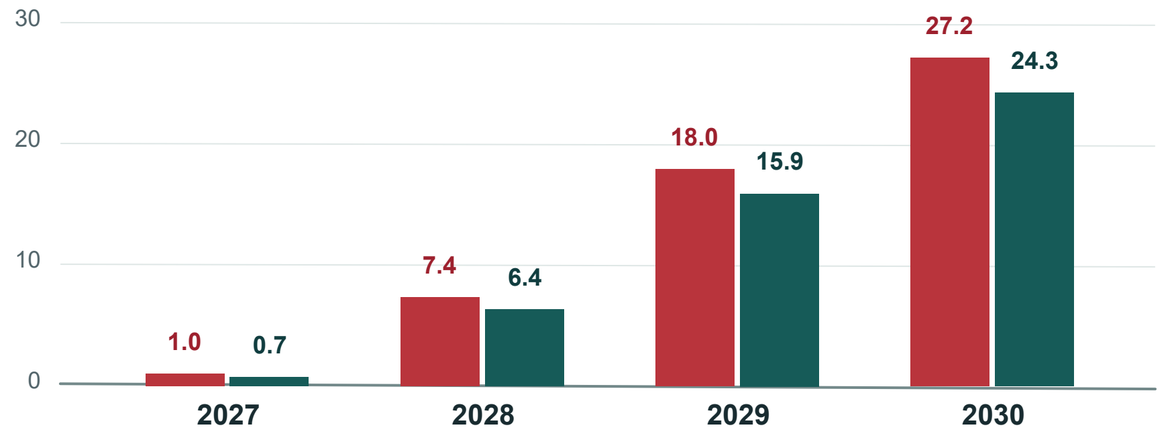
B2B bulk lots to verified buyers and B2C livestream clearance. 2030 success fees: B2B $9.39M + B2C $7.40M = $16.79M.

03 Fee-only revenue

10% up to the reference, 25% above it, capped at 25%. Subscriptions, value-added services and buyer fees add recurring revenue. Merchandise proceeds go to brands.

BASE-CASE REVENUE AND EBITDA

USD million, financial years 2027–2030



2027 PILOT

60

active brands at year-end

Six selling months; modelled fee revenue US$1.04M.

2030 SCALE

871

active brands at year-end

663 OnPoint VN + 158 external VN + 50 Thailand via CREA.

GOODS RECOVERED

$112.65M

2030 net recovery handled

Brand settlement volume, separate from ValueBridge revenue.

CASH PROFILE

$35.21M

cumulative FCF by 2030

2027: +$0.43M; FCF is positive from 2027.

THE PILOT MUST PROVE

1 **Brand conversion**
2 **Lot approval rate**
3 **Realised recovery vs. benchmark**
4 **Direct costs: delivery, returns, staff**

WHY INNOVATE NOW?

OnPoint

Stuck stock grows with e-commerce, and no partner today recovers its value while protecting the brand

01 SITUATION

+44.1%
YoY sales growth

2.19B
items sold

613.8k
active shops

02 COMPLICATION

STUCK STOCK
Slow movers · Returns · End-of-season · Model or packaging change

→

CASH LOCKED
Working capital sits in unsold stock

COSTS RISE
Storage and handling keep adding up

VALUE FALLS
Every month in the warehouse lowers the price

03 MARKET GAP

× **Discount on the Official Store**
Hurts price positioning and conflicts with distributors

× **Hold in warehouse or push to dealers**
Capital stays locked and costs keep rising

× **Liquidate or destroy**
Little or no value recovered, plus disposal cost

The gap: no single partner picks the right channel for each lot and recovers value while protecting the brand

04 OUR ANSWER

B2C
OnPoint-run channels (TikTok Shop, Shopee), separate from the brand's Official Store

B2B
Approved business buyers clear stock by the whole lot

BRAND CONTROL + GAIN-SHARE
Brand keeps ownership and the floor price; the fee is tied to net recovery

OPPORTUNITY SCREENING

OnPoint

Of four ideas screened, only ValueBridge combines a strong OnPoint fit with a clear payer

IDEA	FIT WITH ONPOINT	WILLINGNESS TO PAY	NEW RESOURCES NEEDED	BARRIERS	RESULT
OnPoint ValueBridge B2C / B2B inventory recovery	●●●● Reuses 5 OnPoint assets	**Gain-share: brand pays on results**	B2B buyers, grading, settlement	Prove recovery & cost in the pilot	**SELECTED** **Best fit, clear payer**
GlobalX Help VN brands sell in Thailand	●●●○ VN and TH e-commerce operations	Pays, but cross-border compliance is costly	Legal, tax, customs	Cross-border legal risk	DROPPED Legal and compliance risk
Opollo Financial System Financial service on Opollo	●●●○ Fits the Opollo tech platform	Added value unclear	Dev, QA, rollout support	High build cost, unclear demand	DROPPED Hard to prove clients pay
Product Repair Service Repair damaged goods for resale	●●○○ Links to reverse logistics only	Only if value > repair cost	Skilled techs, equipment, QC	Quality varies by product	DROPPED Needs a specialist team

●●●● = fit with OnPoint's existing assets, from strong to weak

WHY OUR TEAM PROPOSED VALUEBRIDGE

1 **Reuses what OnPoint has**

Brand relationships (400+ brands), livestream (60+ studios, 250 hosts), Opollo, fulfilment and Reverse Logistics

2 **Win-win for brands**

Success fee on net recovery, no large upfront fee; reference recovery agreed upfront, and the fee adjusts to protect the brand

3 **Pilot-ready, light build**

Only three things to build: a B2B buyer network, a grading process and gain-share settlement

WHERE TO PLAY

TAM · VIETNAM + THAILAND
Brands with resalable excess stock or returns

INITIAL SAM SCREEN · 400+
OnPoint / CREA brand relationships

2027 SOM TARGET · 60
Vietnam brands for pilot review

Screen by CRM, eligible stock, condition and resale authority

MODELLED BRAND ACCESS AND EXPANSION

Planning line	2027	2028	2029	2030
OnPoint + CREA relationship base[1]	480	576	691	829
OnPoint-linked Vietnam target	60	288	484	663
External Vietnam brands	—	79	119	158
Thailand via CREA	—	—	30	50
Total end-year target	**60**	**367**	**633**	**871**

20% yearly growth from a 400-brand 2026 base is a model assumption. All target counts require pilot conversion.

PILOT CUSTOMER AND ELIGIBILITY

From 62 shortlisted public OnPoint logos, approach 60 Vietnam brands in 2027. Prioritize beauty and personal care, non-food baby care, and household care because lots can be counted, checked and graded by SKU.

Before handover, confirm actual stock, packaging and expiry, ownership, selling rights and brand approval. The brand decides what to release; B2B buyers and B2C shoppers are resale outlets.

MODELED VALUE PER BRAND-YEAR

20% LARGE BRAND (A) · $1.5M
VND 3,000bn sales × 1.25% returns

80% SME BRAND (B) · $160K
VND 40bn × 60% COGS ÷ 6 turns

Weighted pool: 20% × $1.5M + 80% × $160K = $428K

2027: $428K × 30% handover × 70% saleable = $89,880

2028+: $428K × 50% handover × 70% saleable = $149,800

A/B values and conversion rates are pilot assumptions.

ROUTE TO MARKET AND PILOT PROOF

1 SHORTLIST
OnPoint CRM and external leads

2 VERIFY
SKU, condition, volume and rights

3 MANDATE
Approve handover and gain-share

4 RESELL
B2B / B2C with channel controls

5 SETTLE
Measure sales, costs and brand recovery

Expand after pilot conversion, sell-through and net recovery are confirmed. Thailand via CREA starts only after local approval.

VALUE PROPOSITION & REVENUE MODEL

OnPoint

WHAT EACH SIDE GETS

BRANDS

- **Recover more than a liquidation sale,** with at least the agreed benchmark guaranteed
- **No large upfront fees: ValueBridge** earns most when it beats the benchmark
- **Price protection:** separate channel, closed sessions, floor prices

BUYERS

- **Verified, graded lots** with clear product data
- **Steadier, more reliable supply;** members see lots first

ONPOINT

- **Monetises assets it already runs:** brand relationships, studios and hosts, Opollo, Reverse Logistics

HOW VALUE IS CREATED

= where each revenue stream is earned

2 BRAND STOCK
Excess inventory and returns, consigned: the brand keeps ownership

→

3 ASSESS & GRADE
Inspection via Reverse Logistics; benchmark and floor price set in the mandate

→

B2C LIVESTREAM
Multi-brand clearance sessions on OnPoint-run shops

4 B2B BULK LOTS
Whole lots sold to verified buyers

→

NET RECOVERY
Buyer price minus actual channel costs (passed through, not revenue)

→

1 SETTLEMENT
Brand receives at least the benchmark; ValueBridge keeps its fee

WHERE REVENUE COMES FROM

1 Gain-share success fee — 62%

BRAND PAYS on net recovery after channel costs

10% **up to the benchmark** | 25% **above it**

Benchmark (liquidation quote) | **Uplift**

Benchmark guarantee: if the brand would net less than its benchmark, ValueBridge cuts its fee. Total fee ≤ 25% of net recovery.

Share of FY2030 net revenue, base-case model

2 ValueBridge Programme subscription — 21%

BRAND PAYS **$1,000–1,500/month (≈$15k/yr avg.)**

Opollo slow-mover alerts, monthly stock review, priority livestream slots, no intake fee

3 Value-added services (optional) — 10%

BRAND PAYS **Cost-plus: ≈2.5% of net recovery**

Repackaging and bundling, relabeling, dedicated campaigns, storage beyond 60 days

4 B2B buyer fees — 7%

BUYER PAYS **$1,500/yr + 2% of lot price**

Verified membership for graded lots with product data; starts after the pilot (Jul 2027)

ILLUSTRATION: HOW ONE LOT SETTLES?

Buyers pay $9,000
after returns

→

Channel costs −$1,800
platform, shipping, KOL

→

Net recovery $7,200
vs. $4,800 benchmark

→

ValueBridge fee −$1,080
$480 + $600 = 15% of net recovery

→

Brand receives $6,120
+28% vs. liquidation quote

Revenue = fees only: GMV, brand payouts and channel costs are not ValueBridge revenue (agent model). Non-subscribers pay a $300 intake fee per lot, credited against the success fee.

RIGHT TO WIN

OnPoint

Integrated B2C/B2B recovery, with brand control and fees linked to net recovery outcomes

WHERE TODAY'S OPTIONS FALL SHORT	VALUEBRIDGE'S ANSWER
B2B liquidators Fast bulk disposal, but recovery value is often low	**Optimise net recovery** Route each lot to B2C or B2B; gain-share is based on net proceeds and an agreed benchmark
Brand-led clearance Keeps pricing control, but needs resources and can hurt brand positioning	**Protect brand control** Clearance is kept separate from the Official Store; brands keep ownership and approve price floors and distribution terms
3PLs, B2B platforms, off-price retail Specialist help, but brands still coordinate several partners	**Reduce the brand's workload** One partner handles grading, resale, fulfilment and reconciliation

WHY ONPOINT CAN DELIVER

400+
brands served in Vietnam and Thailand

60+
studios, with 250+ hosts and production staff

Opollo
order, inventory and operational data

Reverse logistics
inspection, grading, storage and delivery

LONG-TERM ADVANTAGE

Growing B2B buyer network + Transaction data + Integrated execution → **Better pricing and channel choice**

CAPABILITIES: BUILD, BUY & PARTNER

OnPoint

ValueBridge stands on assets OnPoint already runs: build three things, buy little, partner for demand

EXISTING FOUNDATION
what ValueBridge reuses

- 01 **Opollo & data** — Product and order data
- 02 **Inventory** — Stock control and returns workflows
- 03 **Fulfilment** — B2B/B2C warehousing
- 04 **Commerce** — E-store and livestream production

▼ ValueBridge adds ▼

01 BUILD

Make inventory recovery an auditable service

Extend Opollo to follow each lot from handover and grading through B2B/B2C sale and final brand settlement. Set eligibility, permitted channels, price floors and gain-share rules before selling.

WORKFLOW
Lot record, inspection, channel decision and payout evidence

PEOPLE (2027 PLAN)
4 inspection & settlement, 7 B2B operations and 8 B2C / livestream FTE

$17k / year
incremental system and data cost in the model

02 BUY

Pay only for equipment and peak-sale capacity

Buy the devices and camera the team needs. Book KOC hosts only for planned four-hour Mega Sale livestreams, so campaign capacity follows demand and measured sell-through.

EQUIPMENT
2027 capex for work devices and livestream equipment

CAMPAIGNS
14 Mega Sale sessions × 2 KOCs × $200 booking per KOC

$12.4k + $5.6k
2027 capex + 2027 KOC booking plan

03 PARTNER

Secure brand authority and buyer demand

Brands approve which lots, prices and channels ValueBridge may use. Build a qualified B2B buyer network for bulk demand; use OnPoint's channels for B2C and CREA for Thailand after approval.

BRANDS & BUYERS
Signed mandate plus buyer checks before any resale

EXPANSION
10 external-brand sales FTE planned for 2028; Thailand from 2029 is conditional

Brand-controlled
stock, sale terms and gain-share settlement

FINANCIAL PLAN

OnPoint

Base case: fee revenue reaches $27.2M by 2030, and the business is cash-positive from its first year

KEY SIGNALS

2027

Cash-positive from the first year

FCF +$0.43M in 2027; no funding gap on annual figures. A monthly cash plan is still needed before approval.

24.1%

Fees / net recovery, 2030

Brand-paid share 22.4% of net recovery, under the 25% cap

FY2030 revenue mix · US$27.2M

Recurring (programme + buyer membership) ≈ 23% of revenue

89%

EBITDA margin, 2030: needs validation

Before VAS delivery costs, which the model does not yet separate. The model flags margins above 60% for review.

SCENARIO & SENSITIVITY ANALYSIS

OnPoint

Even with all eight drivers at Conservative, ValueBridge stays profitable, but misses the $20M target

SCENARIO ASSUMPTIONS (FY2030)

Driver	Conservative	Base	Optimistic

Milestones ▲ = model output	Key inputs measured, not assumed	**★ First paid lot by May 2027**	**▲ 60 brands; $1.04M revenue; EBITDA +$0.74M**	**▲ Traction, end-2028:** 367 brands, $7.35M revenue, EBITDA $6.36M		**▲ 633 brands; $17.98M revenue**	**▲ 871 brands; $27.2M revenue**

DECISION GATES: GO, ADJUST OR STOP

G0 Proof & structure
End Jan 2027

GO IF
- Agent status, invoicing confirmed for 4 streams
- 3–5 pilot brands and 10–15 buyers committed
- Benchmark: ≥2 liquidation quotes / lot

IF NOT
Redesign invoicing or channel before the pilot

G1 Pilot proof
End Jun 2027

GO IF
- 10–20 deals; every lot ≥ benchmark
- Uplift: B2B ≥35%, B2C ≥75%
- B2C channel cost ≤10%; ≥2 repeat brands

IF NOT
Re-price, re-run pilot in Q3 2027; no launch if brands net below benchmark

KEY DECISION

G2 Scale decision
End Jun 2028

GO IF
- Net recovery ≥$150k per brand
- ≥40% subscribe; buyer retention ≥70%
- Then open external VN + Thailand (CREA)

IF NOT
Stay OnPoint-only: forgo 208 of 871 brands in 2030

G3 Clear traction
End Dec 2028

GO IF
- 367 active brands
- 2028 revenue ≥$5.9M (80% of plan)
- FY2028 EBITDA ≥ 0

IF NOT
Hold 2029 hiring until targets are met

G4 On track for FY2030
End Dec 2029

GO IF
- 633 brands (484/119/30)
- Net recovery ≥$150k per brand
- 2029 revenue ≥$14.4M (80% of plan)

IF NOT
Present FY2030 on sensitivity range; freeze fixed-cost growth

FY2030 TARGETS

Base-case model output, not guaranteed

$27.2M
net revenue

$24.3M
EBITDA

871
active brands

663 OnPoint · 158 external VN · 50 Thailand

PATH
- Free cash flow positive from 2027 (annual model)
- Cumulative free cash flow ≈$35M by 2030

BIGGEST RISKS
- All 8 drivers at Conservative: 661 brands, 2030 revenue ≈$17.3M
- Slower Vietnam rollout alone: ≈$22.1M

APPENDIX A: MARKET ASSUMPTIONS

OnPoint

Area	Base-case assumption	Basis / treatment
Selling period	6 months in 2027; 12 months in 2028–2030	Jul–Dec pilot in 2027; full-year selling thereafter.
Vietnam pilot brands	60 prospective brands in 2027	Outreach and qualification target, not signed contracts.
Group A recovery	US$1,500,000 per brand-year, all years	Planning benchmark for annual returned-stock value; verify with brand records.
Group B recovery	US$160,000 per brand-year, all years	Planning benchmark for average inventory; verify by SKU and inventory aging.
Brand handover share	30% in 2027; 50% in 2028–2030	Share of relevant stock value placed within ValueBridge's scope.
Liquidatable share	70% in every year	Eligible resale share after condition and rights checks.
B2C channel fee	10% of buyer-paid B2C sales, all years	Brand-borne. ValueBridge advances and deducts at settlement.
B2B logistics fee	5% of buyer-paid B2B sales, all years	Brand-borne. ValueBridge advances and deducts at settlement.

APPENDIX B: FEE SCHEDULE ASSUMPTIONS

OnPoint

Area	Base-case assumption	Basis / treatment
Base success fee	10% of net recovery up to the baseline	Same rate across B2B and B2C.
Above-baseline share	25% of net recovery above the baseline	Earned only on recovery above the brand's agreed reference.
Success fee cap	25% of total net recovery	Limits aggregate success-fee charge.
Intake fee	US$300 per lot	Credited against success fee; waived for programme members.
Programme subscription	US$1,000 / month in 2027; US$1,250 from 2028	Per subscribing brand.
Programme uptake	15% / 40% / 50% / 50% (2027–2030)	Share of active brands subscribing; model planning assumption.
Value-added services	2.5% of net recovery, all years	Fee revenue for optional services; delivery cost modeled separately.
Paying member buyers	10 / 80 / 200 / 400 (2027–2030)	Verified buyers converted to billing periods.
Buyer membership	US$1,500 per buyer-year	2027 recognizes six months for the paying cohort.
B2B buyer surcharge	2% of B2B lot value sold	Charged on baseline plus uplift, excluding brand-borne delivery fees.

APPENDIX C: STRATEGY ASSUMPTIONS

OnPoint

Area	Base-case assumption	Basis / treatment
Sales productivity	237 working days per FTE-year; 30 sales days per brand closed	Capacity inputs for the dedicated sales team.
Inspection team	4 / 8 / 16 / 20 FTE (2027–2030)	Incremental inspection and reconciliation staff.
B2C and livestream team	8 / 8 / 12 / 12 FTE	Operations, hosts, page management and editing.
Outsourced KOCs	2 / 2 / 3 / 3 per four-hour Mega Sale	Session-based booking, not salaried FTE.
Annual salary cost	US$13,000 inspection; US$10,010 sales, B2B and B2C / FTE	Annual per-person inputs, including 13 salary months.
Sales commission	US$250 per brand signed	Fixed amount tied to closed brands.
KOC booking	US$200 per KOC per four-hour Mega Sale	Fixed cast fee; affiliate commission excluded from the base case.
Systems and data	US$17,000 per year	Incremental Opollo enhancement and maintenance budget.
Legal and compliance	US$6,900 per year	Ongoing programme counsel budget.
Camera and depreciation	US$1,000 camera in 2027; 3-year depreciation	Camera purchase is a direct input; asset schedule is calculated separately.
Corporate income tax	20% in every year	Model tax-rate input.
Fee collection	B2B: 30 / 30 / 45 / 45 days; B2C: 7 days	Timing after buyer or marketplace payment.
Other collection	Subscription and value-added services: 30 days	Monthly billing and collection input.
Brand remittance	15 days after collection	Settlement timing assumption for brand payouts.
B2C order size	US$12 average order value	Used to estimate count of returned orders.
Cost per returned order	US$1 shipping; US$0.40 receiving, checks and repackaging	ValueBridge-borne return processing inputs.

APPENDIX D: EXCEL TABLES

OnPoint

ValueBridge | Financial Summary & Scenarios

ValueBridge revenue consists of fees only; sales proceeds collected on behalf of brands are not recognised as revenue. Figures below update with the selections on 08 Scenarios.

Active scenario — **Base**

Adjust on sheet 08 Scenarios
