CAREER OBJECTIVE

A highly energetic professional with a strong passion for finance, analysis, and applying AI to improve processes and decision-making, currently managing commission closing for 45+ managers across Asia, MENA and Southern Europe, with Group-wide P&L data controls covering 200+ managers. I am eager to further develop my expertise in budgeting, rolling forecasts, and management reporting while exploring AI-driven solutions that deliver meaningful insights and value to the organization. With strong collaboration, adaptability, and a results-driven approach, I am confident in my ability to support the company in achieving its strategic objectives.

EDUCATION

University of Economics HCMC (UEH) Batch 47, 2021-2025

- Bachelor's degree in Finance.
- GPA: 3.65/4.0.

EXPERIENCE

Mantu Group | Group Controlling Officer, Commission & Incentive Cost Control Nov 2025 – Present

- **Closing & payout governance:** Lead monthly, quarterly and annual commission closing cycles across Asia, MENA and Southern Europe for 45+ managers (Vietnam, Singapore, Italy, Japan, China, …), including Directors and EVP, representing ~ €500K in annual payouts.
- **Group P&L Controlling & Variance analysis:** Ensure the accuracy and consistency of whole Group P&L data for 200+ managers before commission calculations by reviewing month-on-month fluctuations in GM% and cross-region cost allocations. Analyze and investigate significant monthly variances with the FP&A manager and assess whether individual managers' performance aligns with country-level results, identifying an average of ~ 30 data discrepancies per month and resolving 95% before closing.
- **Business partnering:** Partner with FP&A, HR and Business stakeholders to align commission outcomes with financial results, planning assumptions and policies. Work with the FP&A manager to finalize business-unit revenue and cost allocations, assess overpayment risk using P&L forecasts and perform simulations to assess the impact of changes in BU allocations, identifying ~ €4K in potential overpayment exposure over six months.
- **Performance analysis & reporting:** Prepare monthly commission performance reports and charts (by manager function, country and entity), consolidating KPIs, variance explanations, risks and action plans for management review. Partner with the Data team to analyze monthly headcount by manager, project delta, new account openings and DSO. Evaluate performance trends, identify key drivers of underperformance and assess payout alignment with business results to recommend corrective actions.
- **Automation & AI:** Designed and deployed three AI agents: a **Commission Policy Assistant** (access through Corp document, SharePoint, FAQ, Mail and MS Teams), an **Automated Payment Auditor** (converting raw payment extracts into interactive audit reports, reduced audit preparation from 1 hour to 10 minutes) and a **Bonus Variance Analysis agent** (entity and business-unit level controls, accelerated data consolidation and dashboard creation for variance analysis).
- **Payment & reconciliation:** Strengthen controls through reconciliation across Bonus, Payroll, and Accounting systems, mitigating risks and ensuring payment accuracy.
- **Process & system improvement:** Drive process automation while tracking system and data pipeline enhancements with the Product Owner to improve reporting efficiency and strengthen data quality.

KinLiving Management | Financial Analyst Intern Mar 2025 – Sep 2025

- Managed and standardized master data for 200+ vendors and 700+ customers across F&B units, ensuring data consistency and reducing duplicates by 15% while improving reconciliation efficiency by 25%.
- Collaborated with IT to test and validate end-to-end financial system workflows, ensuring data accuracy, system integration, and a smooth rollout of the new system.
- Analyzed procurement, operational, and revenue data to identify cost drivers, performance gaps, and opportunities to improve profitability across locations.
- Conducted P&L, cash flow, and A/R analysis to assess financial performance, monitor liquidity, and support forecasting and cash management.
- Prepared investor reporting including P&L and investment metrics (ROI, IRR), translating financial data into actionable insights for strategic decision-making.

PORTFOLIO

- **Portfolio:** https://tuankhoi2411.github.io/
- **Five financial models:** OnPoint ValueBridge, a scenario-driven Excel model for an inventory-recovery service, with 2027-2030 revenue, EBITDA and cash-flow forecasts, eight scenario drivers and a 25-slide presentation.
- **Five Power BI products:** Dashboards covering sales performance and return leakage, campaign conversion, financial resilience, credit risk, and segment profitability.
- **Python automation:** Monthly reporting pipeline that cleans and consolidates Excel inputs, validates data, and generates KPI, P&L audit, and performance-analysis reports.

RESEARCH & AWARDS

Awarded 2 prize B in Young Researcher 2025 recognized by School of Finance - UEH April 2025

- **Research title:** The relationship between digital transformation, financial financing and business performance: an empirical study of listed companies in Vietnam.
- **Research title:** The impact of green finance, eco-innovation, renewable energy and industrialization on CO_2 emissions in Asian countries: policy implications for Vietnam.

LEADERSHIP & ACTIVITIES

Students' Group of Finance Research – SFR UEH

Member of the Investment Analysis Department and the Human Resources Department Jan 2024 – Jan 2025

- Performed budget forecasting for two SFR team-building programs, working in the logistics and stage-management core teams.
- Contributed to event planning and cross-team coordination across the Investment Analysis and Human Resources departments.

CERTIFICATIONS & SKILLS

- **Certifications:** CFI - FMVA, FP&A, BI & Data Analysis (in progress, expected Dec 2026); Mastering Analytical Thinking & Data Analysis with Power BI.
- **Finance & Analysis:** Budgeting and forecasting, rolling forecast, driver-based planning, management reporting, variance analysis, scenario and sensitivity analysis, month-end close, financial modeling, accounting and compliance, audit and reconciliation.
- **Data & BI:** Power BI, DAX, Power Query, star-schema data modeling, ETL, SQL, data mining, data visualization, data quality and master-data management.
- **AI & Automation:** Agentic AI design and deployment (Dust.tt, Codex), RAG over document corpora, human-in-the-loop controls, role-based access design, automated exception detection, workflow automation.
- **Tools:** Excel (proficient), PivotTable (advanced), Power Query (advanced), Power BI (advanced), Python (NumPy, pandas, scikit-learn), SQL.
- **Languages:** English (TOEIC 815), Vietnamese (native).
